敬丹丁

见字如面

时间过的真快，从接触ACCA到现在，已十年有余。

转眼间已从十八岁的无知少年成为一名讲师。还记得我考试的那两年，每天必带练习册，讲义，计算器和一本厚厚的手写A4纸笔记，穿梭在学校，图书馆，自习室，就连跟闺蜜约场电影，也是背着沉甸甸的包去赴约，也曾在自习室里哭的像个傻逼，崩溃过后，继续刷题。当时也不知是哪来的拼劲、不知道前路是何样，也向往着白领精英的生活，但好像离我都特别遥远，只知道先做好眼下的工作、尽早考完所有的学科、早日脱离这苦海。

我一直不是个特别聪明的学生，但我很用心，是只打不死的小强。老师在课堂上全英文授课的时候，我大多听不懂，一开始是因为语言问题，后来好不容易适应了英文，又越学越难，有一种在泥里行走的感觉，摸不到边际，看不到尽头。但我很奇怪，一遇到难点，就会异常兴奋，喜欢这种挑战，更喜欢征服过后的满足感。随着ACCA越学越难，我也越学越入迷，终于，两年全部考完。

在这所有的科目里，最有感情的就是财务报告，因为太过沉迷于报表，也顺带喜欢准则，后来慢慢爱上了IFRS。

当你在一个安静的午后，泡一杯咖啡，坐在图书馆窗边的角落里，阳光洒落在笔记上，思考着某条准则背后的原因时，突然感觉整个人就通透了，这种沉淀式的学习，让我更加迷恋财务报告这门学科。

你不得不承认，兴趣是最好的老师，就连我现在教课，也常常告诉自己，不要丢掉对报表的喜爱。因为喜欢，所以投入，准则是一套优美的体系，希望大家也能从中感受到他的力量。

“ IFRS is Power ”

@敬丹Jane

Exam Format

Computer based examination - 3 hours				
试卷组成	难度系数	题型分布	考察内容	分值
Section A	☆☆☆☆☆	15 道客观题 @ 2分	**所有章节**	30分
Section B	☆☆☆	3 段案例客观题 共15道题 @ 2分	所有准则	30分
Section C	☆☆☆☆☆	2道主观 @ 20分	**Question 1: 财报分析** -单体报表分析 -合并报表分析 **Question 2: 报表编制** - 单体报表 - 合并报表	40分

目录 页码

第一章 报表格式 5
• Statement of financial position 5
• Statement of profit or loss and other comprehensive income 7
• Statement of changes in equity 8
第二章 概念框架 9
第三章 监管框架 17
第四章 资产类准则 23
• IAS 16 Property, plant and equipment 23
• IAS 38 Intangible assets 30
• IAS 40 Investment property 35
• IAS 36 Impairment of assets 39
• IAS 23 Borrowing costs 44
• IAS 2 Inventory 46
• IFRS 5 Non-current assets held for sale and discontinued operation 50
• IAS 41 Agriculture 54
第五章 租赁 57
第六章 预计负债以及或有事项 64
第七章 企业所得税 69
第八章 金融工具 77
第九章 收入 84
• IFRS 15 Revenue from contracts with customers 85
• Substance over form 90
• IAS 20 Government grants 95
第十章 每股收益 101

• IAS 8 Accounting policies, changes in accounting estimates and errors 105
• IAS 10 Events after reporting periods 108
• IAS 21 Foreign currency transactions 111
• IFRS 13 Fair value measurement 113

第十二章 单体报表 115

第十三章 现金流量表 122

第十四章 财报分析 127

第十五章 合并报表介绍 131

第十六章 合并报表编制 135

第一章 报表格式

IFRS 18 Presentation and disclosure of financial statements

Statement of financial position as at year ended 31/12/2026

	S'000
Assets	
Non-current assets	
Property, plant and equipment 固定资产	X
Intangible assets 无形资产	X
Investment property 投资性房地产	X
Right-of-use assets 使用权资产	X
Financial assets 金融资产	X
Deferred tax assets 递延所得税资产	X
	XX
Current assets	
Inventory 期末存货	X
Trade receivable 应收账款	X
Contract assets 合同资产	X
Cash / Bank 银行存款	X
	XX
Non-current assets held for sale 固定资产持有待售	X
Total assets	XX
Equity and liabilities	
Equity	
Share capital / Equity share 股本	X
Share premium 股本溢价/	X
Retained earnings 留存收益	Y
Revaluation surplus /Revaluation reserve 重估盈余	X
Other component of equity Other reserve 其他权益储备	X

	XX
Non-current liabilities	
Loan note/redeemable preference share 债券	X
Convertible loan note：liability element 可转债-债券	X
Loan in substance 实质负债	X
Deferred tax liability 递延所得税负债	X
Lease liability 租赁负债	X
Contract liability 合同负债	X
Deferred income 递延收入	X
	XX
Current liabilities	
Trade payable 应付账款	X
Tax payable 应付所得税	X
Bank overdraft 银行透支	X
Lease liability 租赁负债	X
Contract liability 合同负债	X
Deferred income 递延收入	X
	XX
Total equity and liabilities	XX

【注意】

- 除非国际会计准则要求或允许，否则企业不能将资产和负债或收益和费用相互抵消
- IFRS 18 要求利润表中的收入以及费用需要分类为以下五个大类：(见第十二章)

① Operating category 经营活动

② Investing category 投资活动

③ Financing category 融资活动

④ Income taxes category 企业所得税活动

⑤ Discontinued operation category 停止经营活动（见第四章）

Statement of profit or loss and other comprehensive income for the year ended 31/12/2026

	$'000	
Sales revenue	X	
Less: Cost of sales	(X)	
Gross profit 毛利润		
Add: Other operating income	X	
Less: Operating expense:		**Operating**
Selling expense	(X)	
Research and development expense	(X)	
General administrative expense	(X)	
Other operating expense	(X)	
Operating profit 经营利润（新增）	X	
Share of profit of associate	X	
Investment income	X	**Investing**
Profit before financing and income tax 息税前利润	X	
Interest expense from borrowing and lease liability	(X)	
Interest expense on provision	(X)	**Financing**
Profit before income tax 税前利润	X	
Income tax expense	(X)	**Income tax**
Profit 净利润		
Other comprehensive income:		
Revaluation gain under revaluation model (netted off tax effect)	X	
Gain or loss of FVTOCI	X/(X)	
Total comprehensive income	**XX**	

【注意】

- 经营活动中的费用需要按功能分类呈现，例如销售费用，研发费用，管理费用等。
- 如果费用功能性质相同，则可以合并记录总费用　但如果个别费用金额较大，或属于一次性费用，例如裁员费，企业重组费用，商誉减值损失等，需要单独列示。

敬丹Jane

Closing balance	**X**	**X**	**X**	**X**	**X**

第二章 概念框架

1. Conceptual framework

A conceptual framework is the theoretical basis for determining which events should be accounted for, how they should be measured and how they should be communicated to the user.The Conceptual Framework is not a Standard. Nothing in it overrides any requirement in a Standard.

《概念框架》不是国际会计准则，因此不对任何特定的计量和列报确立具体标准，但它是会计准则的制定基础，它包含了编制报表的基本原则，财报信息的质量特征，会计要素的定义，确认和计量等。理事会认为，在为数不多的情况下，本《概念框架》和某项国际会计准则之间可能会有抵触，在此情况下应当以国际会计准则而不是本《概念框架》要求为准。

> 考点：IFRS overrides Conceptual framework. 当准则与本概念框架冲突时，以具体准则为主，准则凌驾于概念框架。

1.1 Advantages of a conceptual framework

① Accounting standards are developed on the same theoretical principles which avoids a haphazard approach to settling standards 会计准则是基于相同的理论原则制定的，避免了随意制定准则的做法

② The development of accounting standards is less subject to political pressure 会计准则的制定受政治压力的影响较小

③ Accounting standards use a consistent approach（without a conceptual framework，some standards may concentrate on profit or loss whereas some may concentrate on the valuation of net assets）会计准则采用一致的方法（没有概念框架，一些准则可能侧重于损益，而另一些准则可能侧重于净资产估值）

④ A principle-based approach avoids the need for large volumes of rules to address every scenario 基于原则的方法避免了需要大量准则来解决每种情况的问题

1.2 Disadvantages of a conceptual framework

① It is not certain that a single conceptual framework can be devised which will suit all users 尚不确定能否设计出一个适合所有用户的单一概念框架

② Given the diversity of user requirements, there may be a need for a variety of accounting standards, each produced a different purpose and with different concepts as a basis 鉴于用户需求的多样性，可能需要各种会计准则，每种准则都有不同的目的，并以不同的概念为基础

③ It is not clear that a conceptual framework makes the task of preparing and then implementing standards any easier than without a framework 尚不清楚概念框架是否比没有框架更容易制定和实施

2. Basic concepts

2.1 Going Concern【Underlying assumption】

The Conceptual Framework states that financial statements are normally prepared on the assumption that the reporting entity will continue for the foreseeable future. In other words, it is assumed the entity will not enter liquidation, or cease to trade. 在可预见的未来企业没有破产清算的打算，可预见未来指未来十二个月。

If this is not the case then the financial statements would be prepared on a break-up basis. 一旦企业失去可持续经营，就需要用破产清算原则重新编制报表。

2.2 Accrual basis

The effects of transactions and other events are recognised when they occur (and not as cash is received or paid) and they are recorded in the accounting records and reported in the financial statements of the periods to which they relate.

The accrual basis gives rise to the "matching" concept – that expenses are recognised based on a direct association between costs incurred and earning of income.

权责发生制要求企业在收入和费用发生时确认，而不是按照现金收付来确认。同时，在利润表中确认的收入和费用需要遵循匹配性原则即 matching rule。

3. Qualitative characteristics

Fundamental 基本特征	
Relevance	Information should influence the economic decisions of users. Financial information is capable of making a difference in decisions if it has **predictive value, confirmatory value** or both. 相关性指那些能够影响财务决策的信息。如果信息具有预测价值，证实价值或两者兼有，则能够对决策产生重要影响。预测价值指能够被使用者在预测未来结果中参考；证实价值指该信息提供了关于之前评估的反馈（证实或更改）。 【Materiality】is **entity-specific** and based on its nature and magnitude. Information is material if omitting it or misstatement it could influence decision that the users make on the basis of financial statements. 如果省略或误报某信息会影响使用者决策，则该信息具有重要性。信息的重要性受到性质和金额大小影响。

Faithful representation	① Complete: all information necessary for understanding ② Neutral: without a basis, supported by exercise of prudence* ③ Free from error: processes and descriptions without error. does not mean perfect ④ Substance over form: transactions and other events are accounted for and presented in accordance with their economic reality and not merely their legal form. 企业应根据交易的经济本质确认而非法律形式。 Prudence: the exercise of caution when making estimates under of uncertainty, such that assets and income are not overstated and liabilities and expenses are not understated. For example: • assets are tested for impairment and resulting losses are recognised (IAS 36) • inventories are measured at the lower of cost and net realisable value (IAS 2) • provisions are recognised for liabilities even if not certain (IAS 37)
Enhancing 强化特征	
Comparability	Information should be compared through time to identify trends, or with other entity's statements. 可比性是能过令使用者识别各项目之间的相似性和差异性，它不应与一致性相混。 【Consistency】Consistency refers to the use of the same methods for the same items, either from period to period within a reporting entity or in a single period across entities. 一致性指企业针对相同的项目使用相同的方法处理 For example: • Disclosure the accounting polices • Retrospective adjustment for changing of accounting policies（IAS 8）
Verifiability	It means that different knowledgeable and independent observers could reach consensus that a particular depiction is a faithful representation. 可验证性意味着不同的知情及独立观察者能够就某一特定描述是否真实而达成共识。可验证性有助于使用者确定这些信息是否遵循了忠实表达，即表达了其旨在反映的经济现象。 For example: • Inventory count • Valuation by a specialist 资产评估师对资产估值
Timeliness	Timeliness means having information available to decision-making in time to be capable of influencing their decisions. 及时性意味着决策者及时提供能够影响其决策的信息。

Understandability	The information of financial statements should be understood by users who have a reasonable knowledge of business and economic activities. Classifying, characterizing and representing information clearly and concisely makes it understandable. 清晰和简明地对信息进行分类，界定其特征和列报信息是可理解性的要求。 **Complex matters** should not be left out of financial statements simply due to their difficulty if the information is relevant. 对于复杂信息虽然会使财报不易被使用者理解，但也不可以将此信息剔除，因为漏报会使信息不完整而误导使用者。

3. Five elements

Assets【背过】	- A present economic resource controlled by the entity as a result of past events - Economic resource is a right that has the potential to produce economic benefits
Liability【背过】	- A present obligation of the entity to transfer an economic resource as a result of past events - Obligation: is a duty of responsibility that an entity has no practical ability to avoid
Equity【背过】	Equity is the residual interest in the assets of the entity after deducting all its liabilities.
Income	Income is increases in economic benefits during the accounting period in the form of inflows or enhancements of assets or decreases of liabilities that result in increases in equity, other than those relating to contributions from equity participants.
Expense	Expense is decreases in economic benefits during the accounting period in the form of outflows or depletions of assets or incurrences of liabilities that result in decreases in equity, other than those relating to distributions to equity participants.

4. Recognition of elements【更新过】

The conceptual framework requires an item to be recognised in the financial statements if:

① Meets the definition of an elements

② Recognition of that element provides users of the financial statements with information that is useful, ie with:

- Relevant information about the element
- A faithful representation of the element

Recognition is subject to cost constraint: the benefits of the information provided by recognising an element should justify the costs of recognising that element

成本对于财务报表能够提供的信息构成普遍限制。报告财务信息需付出成本，而重要的是报告此类信息所带来的利益能够证明相关成本是合理的。

5. Measurement of elements【背过】

The conceptual framework specifically refers to two measurement bases:

A. Historical cost

B. Current value :

① Current cost

② Fair value

③ Value in use (Asset) and fulfillment value (Liability)

	Assets	**Liability**
Historical cost	The historical cost of an asset when it is acquired or created is the value of the costs incurred in acquiring or creating the asset, comprising the consideration paid to acquire or create the asset plus transaction costs. 按照购置或获得资产时所支付的现金来计量，包含交易成本。	The historical cost of a liability when it is incurred or taken on is the value of the consideration received to incur or take on the liability minus transaction costs. 按照承担义务时所收到的款项金额计量，并减去交易成本。
Current cost	The current cost of an asset is the cost of an equivalent asset at the measurement date, comprising the consideration that would be paid at the measurement date plus the transaction costs that would be incurred at that date. 按照现在购买同一资产或类似资产所需支付的现金计量，包含交易成本。	The current cost of a liability is the consideration that would be received for an equivalent liability at the measurement date minus the transaction costs that would be incurred at that date. 按照现在偿付该负债所需支付的现金来计量，并减去交易成本。
Fair value	The price that would be received to sell an asset, or paid to transfer a liability, in an orderly transaction between market participants at the measurement date 在有序交易中，双方自愿支付或收到的金额 IFRS 13 defines fair values as an exit price. 公允价值是一种脱手价格即退出价格	

Value in use (Assets) Fulfillment value (Liability)	Value in use is the present value of the cash flows, or other economic benefits that an entity expects to derive from the use of an asset and from its ultimate disposal 按照其资产正在使用中所能产生的，未来现金流入（减去最终处置资产的现金流出）净额的折现价值计量。 Value in use considers entity-specific factors, whereas fair value is market-specific. 使用价值是以企业自身情况来决定的价值，但市场价是以市场情况来决定的价值。	Fulfillment value is the present value of the cash, or other economic resources, that an entity expects to be obliged to transfer as it fulfills a liability. 按照其予以偿还所需的，未来现金流出的折现价值计量。 Fulfillment value is entity-specific. 履约价值是以企业自身情况来决定的价值。

【注意】Value in use 和 Fulfillment value的计量方法建立在企业自身假设 "Entity-specific assumptions" 的基础上，根据企业不同的情况而预测未来现金流。

Advantages of the historical cost:

① Simple to understand 便于理解

② Amounts are reliable, they can always be verified, they exist on invoice and documents. 容易验证，历史成本即购买价值，一般都会有对应的原始凭证

③ Amounts used are objective, as it is more difficult to manipulate cost-based figures. 较为客观，难篡改

Disadvantages of the historical cost:

① The carrying value of assets is often substantially different to market value 跟现值存在较大差异

② No account is taken of inflation meaning that profits are overstated and assets understated 没有考虑通货膨胀等因素对科目价值的影响，容易造成资产低估以及利润高估（当资产低估，折旧低估，所以会造成利润高估）

③ Ratios like Return on capital employed（ROCE）are distorted 会导致个别财务比例失真

Advantages of using current value:

① Current value is a useful guide for management in deciding whether to hold or sell assets and when to settle the liability. 利于管理层决定资产是继续持有还是直接卖掉，以及负债是否现在偿还

② It is relevant to the needs of information users in:

Assessing the stability of the business entity 利于报表使用者衡量企业稳定性

Assessing the liquidity of the business 利于报表使用者衡量企业流动性

Disadvantages of using current value:

① Amounts require subjective judgement by management 估值需要主观判断

② As the Conceptual Framework allows different group assets and liabilities to be valued on different bases, this can mean that some assets will be valued at current cost, but others will be valued at value in use or fair value. 概念框架允许企业选择不同的计量方法，也就意味着同一企业内部使用不同的计量方法，例如有的资产使用替换成本法，有的资产使用公允价值或使用价值计量

【经典例题】

1、**2021年6月考官报告**

Which of the following is NOT included in the IASB definition of an asset in the Conceptual Framework for financial reporting?

A、The asset is controlled by the entity

B、The asset is a present economic resource

C、The economic resource can be reliably measured

D、The asset exists as a result of past events

Drexler company acquired an item of plant on 1 October 2012 at a cost of $500,000. It has expected life of 5 years (Straight-line depreciation) and an estimated residual value of 10% of its historical cost or current cost. As at 30 September 2014, the manufacturer of the plant still makes the same item of plant and its current price is $600,000.

What is the correct carrying amount to be shown in the financial statement as at 30 September 2014 under historical cost and current cost.

	Historical cost	Current cost
A.	320,000	600,000
B.	320,000	384,000
C.	300,000	600,000
D.	300,000	384,000

Answer: C B

第三章 监管框架

1. Principles-based vs rules-based approach

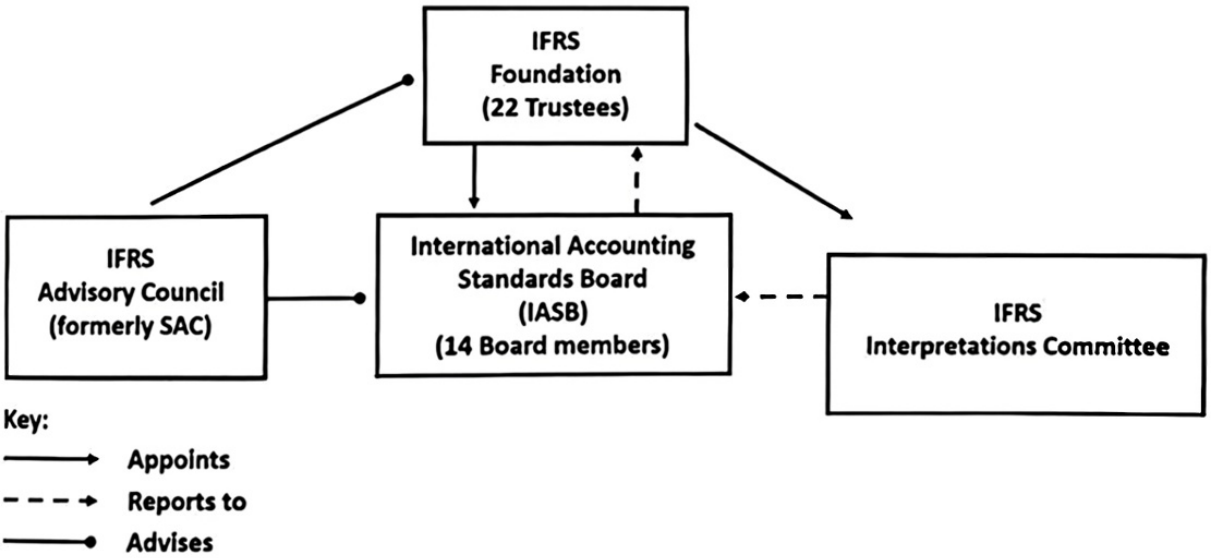
Principal-based approach	Rule-based approach
A principles-based (conceptual framework) approach such as that used by the IASB. 此为原则导向法，也是ACCA正在使用的会计体系，以原则为基础研究颁布主要准则，在没有准则的领域，依然以原则为准来处理。	A rules-based approach such as that used in the US. 此为准则导向法，也是美国GAAP正在使用的体系，在所有领域都以具体准则为准，没有统一的原则指导。

Advantages of principle-based:

① Single framework ensuring consistency across standards 能使准则之间更协调统一

② Principle avoid requirement of excessive detail in standards 避免准则内容过于繁琐

2. Regulatory framework



IFRS Foundation	The IFRS Foundation is an independent body that oversees the IASB. Its objective is to: ① 通过IASB制定准则：develop a single set of high quality, understandable, enforceable and globally accepted accounting standards through its standard-setting body, the IASB ② 推广使用：promote the use and rigorous application of those standards. ③ 实现趋同：bring about convergence of national accounting standards and IFRSs to high quality solutions. ④ 考虑特殊需求：take account of financial reporting needs of emerging economies and SMEs（跨国公司以及中小企业财报需求）
IASB	The International Accounting Standards Board (IASB) is an independent, privately-funded body that develops and approves International Financial Reporting Standards (IFRSs).
IFRS Advisory Council	The IFRS AC is essentially a forum used by the IASB to consult with the outside world. It consults with national standard setters, academics, user groups and a host of other interested parties to advise the IASB on a range of issues, from the IASB work program for developing new IFRSs, to giving practical advice on the implementation of particular standards.
IFRS Interpretation Committee	The IFRS IC provides guidance on specific practical issues in the interpretation of IFRSs.
ISSB **可持续发展委员会（新增）**	The ISSB is responsible for developing a set of sustainability disclosure standards – "Sustainability Disclosure Standards". The intention of ISSB is to deliver a comprehensive global baseline of standards for sustainability-related disclosures. The standards are to provide investors with information about the companies' sustainability-related risks and opportunities. The ISSB issued its first two IFRS Sustainability Disclosure Standards in June 2023: IFRS S1: General Requirement for Disclosure of Sustainability-related Financial information IFRS S2: Climate-related Disclosures

Advantages of IFRS:

(a) Greater international consistency and comparability of financial statements 提高了财报的一致性和可比性（但国际会计准则的使用并不具有强制性，并非所有上市公司都需使用）

(b) Facilities cross- border investment 有利益跨国投资

(c) Greater control over, and understanding of, foreign operations 更有利于理解海外经营业

(d) Consolidation of foreign operations using IFRS Accounting Standards is easier 利于海外企业合并报表的编制

Disadvantages of IFRS:

(a) IFRS Accounting Standards may not meet local needs 不满足具体国家需求，并且不适用于所有企业类型

(b) Loss of control and independence 使用执行的成本高

(c) Interference and conflicts with national and regional law 个别内容与本国准则不一致

3. IFRS S1【新增】

3.1 Objective

The objective of IFRS S1 is to require an entity to disclose information about its sustainability-related risks and opportunities that is useful to investors when making decisions.

3.2 Scope

An entity may apply IFRS S1 irrespective whether they prepare their financial statements in accordance with IFRS Accounting Standards or other generally accepted accounting principles.

3.3 Core content

IFRS S1 requires a company to disclose how it manages its sustainability-related risks and opportunities under four headings:

- Governance
- Strategy
- Risk management
- Metrics and targets

Category	Disclosure contents【了解即可，不用背】
Governance	Governance processes used to monitor sustainability related risks and opportunities. 需要披露企业治理指用于监控可持续性相关风险和机遇的治理流程，例如关于高管层可持续性监督小组和报告的信息、关于监控风险和机遇总体责任委托的详细信息、高管可持续性会议的频率以及任何与可持续性相关的高管活动。

Strategy	The approach the entity uses to manage sustainability related risks and opportunities. 披露可持续发展相关风险和机遇的政策方法，例如识别可持续发展相关的风险和机遇、企业为减轻风险和利用这些机遇而采用的策略，风险和机遇带来的财务影响、可持续发展相关风险对财务计划、预测和预算的影响，以及对企业对可持续发展风险的弹性/敏感性的评估。
Risk management	The processes the entity uses to identify, assess and monitor sustainability related risks and opportunities. 披露在风险管理体现在用于识别、评估、优先考虑和监测可持续性相关风险和机遇的过程，例如风险评估中使用的数据来源、用于评估风险敞口的任何情景分析、如何识别风险影响的性质、概率和程度。
Metrics and targets	The entity's performance in relation to sustainability related risks and opportunities, including progress towards any targets the entity has set or is required to meet by law or regulation. 披露企业在可持续发展相关风险和机遇方面的表现，包括在企业已设定或法律或法规要求实现的任何目标方面的进展，例如用于可持续发展研究的收入百分比、可再生能源使用百分比、可回收包装百分比、使用的公平贸易供应商百分比。

4. Due process 准则颁布流程

Step 1: Consultant with advisory council (咨询委员会)

Step 2: Develop a discussion paper (文字讨论手稿)

Step 3: Develop exposure draft and publish for public comment at least 120 days (施行草稿)

Step 4: Conduct a post-implementation review（收集草稿试用反馈意见）

Step 5: Issue final IFRS （正式准则出台）

5. Not-for-profit and public sector entities【考过几次】

The main aims of not-for-profit and public sector entities are very different to those of profit-orientated entities:

非营利性机构	营利性机构
Financial aim is to achieve value for money and provide service.	Financial aim is to make profit and increase shareholder wealth
Managers are accountable to trustees / government / public.	Directors are accountable to shareholders.
Finance limited to donations / government subsidies.	External finance freely available in the form of loans and share capital.

【注意】

非营利性机构以及社会机构的主要目的不是为股东赚钱，而是服务社会提供支持，所以衡量此机构的标准是三个“E”：

- Economy：costs of resources used and the output obtained（Inputs）
- Efficiency：how is the work completed（outputs）
- Effectiveness：what is achieved（results）

同时也会用 Key performance indicators（KPI）来衡量非营利机构的表现，例如医院的KPI包括 Percentage of patients treated successfully and level of skilled staff in the department

☐ 考点：

Non-for-profit 需要计算的ratio包括：

① Current and Quick ratio
② Inventory holding period
③ Receivable collection period
④ Payable payment period
⑤ Gearings

Non-for- profit不需要计算的ratio：

① Gross profit margin
② Operating profit margin
③ Return on capital employed
④ EPS

【经典例题】

1. 2025年3月模拟卷

What is the primary objective of IFRS S1 General Requirements for Disclosure of Sustainability - related Financial Information?

A. To mandate the entities to focus on short-term financial risks and opportunities
B. To enhance the environmental conservation impact of entities by disclosing their efforts for climate action
C. To encourage short-term profit maximization of investors and create value for shareholders
D. To ensure that entities disclose information about sustainability - related risks and opportunities useful for making decisions on providing resources to the entity

2. 2025年3月真题

Which of the following areas do entities need to provide disclosures on according to IFRS S1 General Requirement for Disclosure of Sustainability-related Financial Information?

1. Governance
2. Strategy
3. Risk management
4. Metrics and target

A. 1 and 2 only
B. 2 and 3 only
C. 2, 3 and 4 only
D. All of the above

Answer: D, D

第四章 资产类准则

- IAS 16 Property, plant and equipment
- IAS 38 Intangible assets
- IAS 40 Investment property
- IAS 36 Impairment of assets
- IAS 23 Borrowing costs
- IAS 2 Inventory
- IFRS 5 Non-current assets held for sale and discontinued operation
- IAS 41 Agriculture

IAS 16 Property, plant and equipment

1. Definition and recognition

1.1 Definition

Property, plant and equipment are tangible assets that:

- are held for use in the production or supply of goods or services, for administrative purposes, and
- are expected to be used during more than one accounting period

1.2 Recognition

Items of property, plant, and equipment should be recognized as assets when it is probable that:

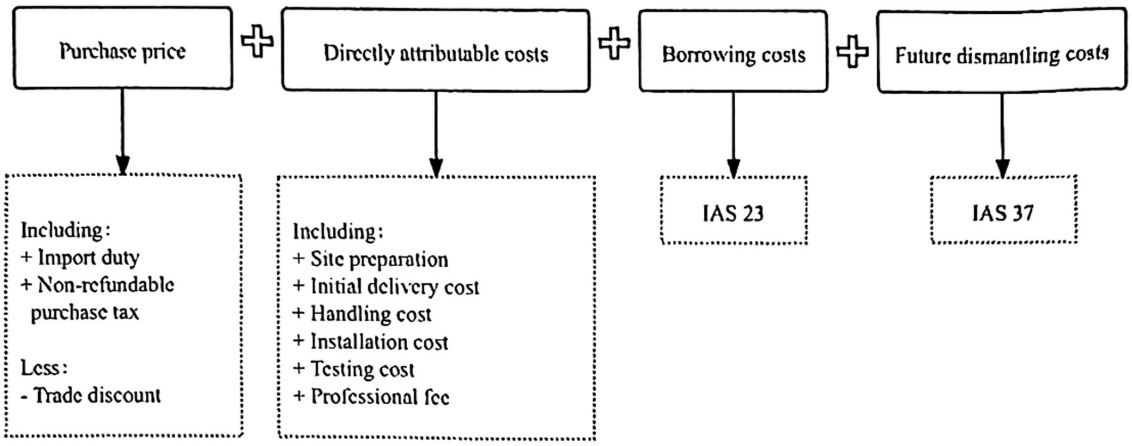
① It is **probable** that the future economic benefits associated with the asset will flow to the entity

② The cost of the asset can be **measured reliably**

2. Initial measurement

IAS 16 requires PPE initially measured at cost.

Cost is all necessary costs involved in bringing the asset into working condition including cost of purchase, directly attributable cost etc.



Cost excludes:

- Unused material
- Initial operating losses before asset reaches planned performance 启动成本费用化
- Staff training
- Maintenance or warranty
- Marketing cost
- Administrative overheads

注意：测试阶段产生的产品若出售，收入属于经营活动分类中的other operating income

3. Depreciation

Deprecation is the allocation of cost of assets over its useful life. Land has no finite life, therefore excluded from depreciation

Straight-line method	Reducing balance method
$\frac{\text{Cost - residual value}}{\text{Useful life}}$	NBV（期初）✖%
（Cost - residual value）✖%	Net Book Value = Cost - Accumulated depreciation

Example 1:

PPE's cost is $9,000

Useful life is 3 years

Cost	Deprecation	Accumulated depreciation	NBV
9,000	9,000/3 = 3,000	3,000	6,000
9,000	9,000/3 = 3,000	6,000	3,000
9,000	9,000/3 = 3,000	9,000	

Example 2:

PPE's cost is $9,000

Its depreciate at 20% per annual using reducing balance method

Cost	Deprecation	Accumulated depreciation	NBV
9,000	9,000 * 20% = 1,800	1,800	7,200
9,000	7,200 * 20% = 1,440	3,240	5,760

☑ 考点:

- 折旧费用属于经营活动分类，具体费用分类见大题材料要求。
- 企业应该在资产达到预计可使用状态时开始折旧，资产报废或处置时终止折旧，过程中即便资产处于闲置状态也需要正常折旧，除非转为"固定资产持有待售"满足IFRS 5确认条件。
- 残余价值，使用寿命和折旧方法需要至少每年年底进行一次回顾检查，如果发生改变，需要用变更当日资产剩余的账面价值，计算后续折旧。
- 如果资产每个部件的成本与该资产的总成本相比是重大的，则该部件需要单独折旧。
- 每一期间的折旧费用应确认在利润表中，除非将折旧包含在其他资产价值中。

4. Subsequent measurement

IAS 16 Permits two accounting methods as subsequent measurement:

Cost model	Revaluation model
Carry the asset at its historical cost less: - depreciation and - any accumulated impairment loss (IAS 36)	Carry the asset at a revalued amount, being its fair value at the date of the revaluation less: - depreciation and - any accumulated impairment loss (IAS 36) 注意: The IAS 16 makes clear that the revaluation model is available only if the fair value of the item can be measured reliably.

4.1 Revaluation upwards

Dr PPE

Cr Revaluation gain（OCI/RS）

Statement of profit or loss and other comprehensive income	
SPL	
OCI:	
Revaluation gain	50

Statement of financial position	
Assets	
Equity:	
Revaluation surplus	50
Liability	

4.2 Revaluation downwards

Dr Revaluation loss（SPL）

Cr PPE

Statement of profit or loss and other comprehensive income	
SPL	
Revaluation loss	(50)
OCI	

【重估法注意事项】

① 重估频率：Revaluations must subsequently be made with sufficient **regularity** to ensure that the carrying amount does not differ materially from the fair value.

② 重估要求：When an item of property, plant and equipment is revalued, the **entire** class of assets to which the item belongs must be revalued.

③ **Revaluation gains** are credited to OCI and then transfer to equity as revaluation surplus. 重估增值先记入OCI，然后再结转成为equity中的重估盈余RS

④ **Revaluation loss** should be recognized as an expense to profit and loss. 重估减值需要立即确认到SPL中作为亏损费用（属于经营活动分类 具体费用分类见大题材料要求）

⑤ 列示要求：Revaluation gain and revaluation loss cannot be offset

⑥ 重估回转：The gain reverses a previous revaluation loss（SPL：expense）of the same asset previously，in which case it should be recognized in profit or loss as income（SPL：income）就同一资产而言，该增值中相当于回转以前确认为重估减值的部分，应该确认为收益

⑦ 重估后折旧：Depreciation must charge, based on revalued amount, over remaining useful life 重估后的资产折旧需要以重估后的资产价值即公允价值来计算

⑧ 多余折旧转移：Make annual transfer from revaluation surplus to retained earnings for excess depreciation 如果题目要求，我们需要在重估后的每一年转移多余折旧，从RS转移到RE中去：

Dr Revaluation surplus X
Cr Retained earnings X

【注意】多余折旧的转移是选做的，如果题目要求我们再做，如果题目没有要求则默认不做

4. Subsequent expenditure

Capital expenditure	Revenue expenditure
Subsequent expenditure on property, plant and equipment should only be capitalized if it **improves** the asset beyond its originally assessed standard of performance. E.g. - Upgrade cost - Complex assets's major overhaul or safety check	All other expenditure incurred to **maintain** the economic benefits originally expected should be expensed in statement of profit or loss. E.g. - Repair cost - Cleaning cost - Repainting cost

5. Disposal

SPL	SOFP
Profit or loss on disposal = Proceeds - carrying amount 注意：处置PPE盈亏属于经营活动分类，具体费用分类见大题材料要求	Transfer remaining RS to RE

Dr Cash Dr/Cr Gain or loss（SPL） Cr PPE	Dr Revaluation surplus Cr Retained earnings

1

☑ 划重点：

- 达到预计使用状态（ready for use）开始折旧，不是使用再折旧
- 过程中即使短暂闲置也要折旧，除非资产报废处置或转为持有待售资产（满足条件）则可以停止折旧
- 残值、寿命，折旧方法每年回顾一遍，一旦改编则用剩余的NBV计算今后的折旧
- 并不是每年重估，而是看FV是否发生重大变化
- 一个资产重估，同类资产一起重估
- 不同资产各自的增减值不可相互抵消（cannot offsetting）

【经典例题】

4.

Elite Co is a private limited liability company that operates a single cruise ship. The ship was acquired on 1 October 20W6 (ten years before 20X6). Details of the cost of the ship's components and the basis on which they are depreciated is as follows:

Component	Original cost	Depreciation basis
	m	
Ship's fabric	300	25 years straight -line
Cabins and entertainment area fittings	150	12 years straight-line
Propulsion system	100	Useful life of 40,000 hours

The propulsion system has been used for 30,000 hours at 30 September 20X4. Due to the unreliability of the system, a decision was taken in early October 20X4 to replace the whole of the propulsion system at a cost of $140m. The useful life of the new propulsion system was 50,000 hours and in the year ended 30 September 20X5 the ship had used the system for 5,000 hours.

Ans

At the same time as the propulsion system replacement, Elite Co took the opportunity to do a limited upgrade to the facilities at a cost of $60m and repaint the ship's fabric at a cost of $20m.

敬丹Jane

1. **At 30 September 20X4 the ship is eight years old. What is the carrying amount of the ship at date date?**
   A. $279m
   B. $275m
   C. $229m
   D. $254m

2. **What is the amount of depreciation charge in relation to the propulsion system for the year ended 30 September 20X5?**
   A. $14m
   B. $39m
   C. $17.5m
   D. $16.5m

3 **Apart from depreciation, what is the charge to profit or loss for the year ended 30 September 20X5?**
   A. $20m
   B. $25m
   C. $45m
   D. $40m

4. **Elite Co's ship has to have a safety check carried out every five years at a cost of $50,000 in order to be licensed to operate. How should this be accounted for?**
   A. Set up a provision for this discounted present value and unwind over five years
   B. Accrue the cost of the check over five years until it takes place
   C. Charge $50,000 to profit or loss when incurred
   D Capitalize the cost when incurred and amortize over five years

Answer: A A C D

IAS 38 Intangible assets

1. Definition

1.1 Definition

An intangible asset is an identifiable non-monetary asset without physical substance.

1.2 Identifiable:

- **"Separable"** 可分离的，即能够从主体中分离或划分出来，并能单独或与相关资产一起使用，可以出售，转移，租赁或交换，不论主体是否有意进行这些交易，或者；
- Arises from contractual or other **legal rights** 源自合同或其他法定权利

2. Recognition

① Identifiable
② Controlled assets
③ It is **probable** that the expected economic benefits that are attributable to the asset will flow to the entity
④ The cost of the asset can be measured **reliably**

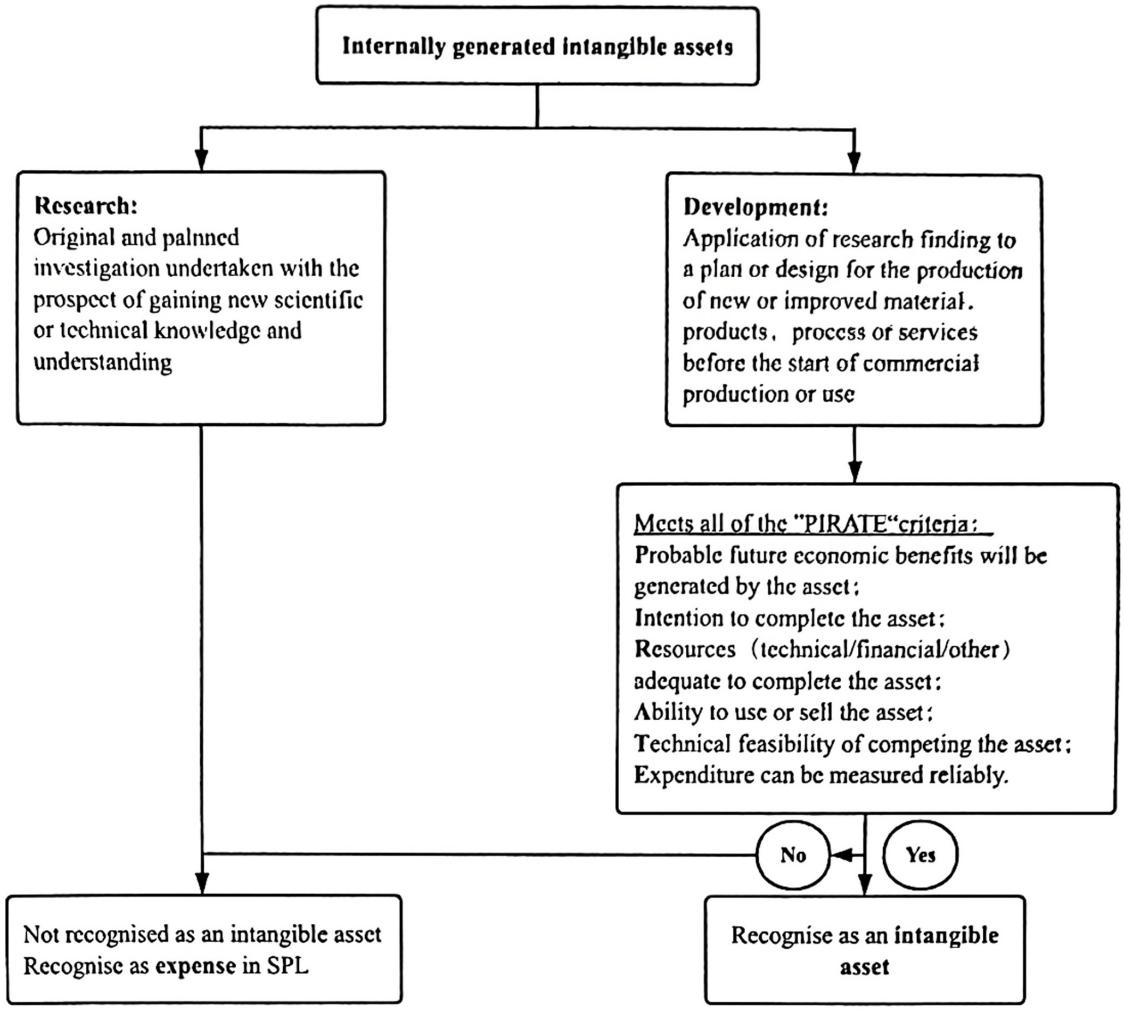
3. Accounting treatment

3.1 External purchased

The recognition criteria are always presumed to have been met for intangible assets that are acquired separately or acquired as part of a business combination. Therefore can be recognized as intangible asset in the statement of financial position.

3.2 Internal generated

Internally generated brands, mastheads, publishing titles, customer lists and similar items cannot be recognized as intangible assets. Expenditure on these times should be recognized as expense when its incurred



☑ 考点：

研发费用（资本化条件不满足需要费用化）在利润表中需要单独列示（经营活动分类），属于金额较大且一次性费用，不能与其他费用合并记录。

4. Initial measurement

External purchase: measured at cost

Internal development: measured at sum total of capital expenditure

5. Subsequent measurement

- Cost model
- Revaluation model

☑ 考点：无形资产后续计量的选择不一定要与PPE保持一致，企业可以按实际情况选择成本法或重估法计量其无形资产。理论上，无形资产后续计量可以使用重估法，但前提是存在活跃市场，可以获得公允价值，如果不存在活跃市场，无形资产只能用成本法计量。

6. Amortization

The amortization of an intangible asset with a finite useful life shall be allocated over its useful life.

☐ 考点：According to IAS 38, the amortization method should reflect the expected pattern of consumption of the expected future economic benefits embodied in an intangible asset. 根据国际会计准则第38号，无形资产摊销方法应反映无形资产的预期未来经济利益的消耗模式，考试中绝大多数使用直线摊销法。

Finite useful life	Indefinite useful life
Straight-line method: = Cost ÷ useful life = Cost ✕ % 注意：无形资产没有残余价值 **Double- entry:** Dr Amortization expense（SPL） Cr Accumulated amortization **SOFP:** **NBV = Cost - accumulated amortization** • The useful life and the amortization method for an intangible asset with a finite useful life shall be reviewed at least at each year end	• An intangible asset with an indefinite useful life **shall not** be amortized • The useful life of an intangible asset that is not being amortized shall be **reviewed each** year end • Should be **tested for impairment** at every year end

☑ 划重点：

无形资产开始使用再摊销

- 寿命需要每年回顾一遍（考过文字判断）
- 有明确寿命按寿命摊销、没有明确寿命不摊销
- 无形资产可以重估、但前提是要有活跃市场计算FV（考过文字判断）

无形资产的后续计量不必和PPE的后续计量保持一致（考过文字判断）

- 处置无形资产盈亏属于经营活动分类

【经典例题】

1. 2020年3月考官报告

Indicates which of the options below should be recognized as intangible assets by dragging and dropping the appropriate options into the grey targets boxes.

Options		Intangible assets
Brandname developed by New Designs Co worth $10m	$2m spent on an advertising campaign expected to increase revenue by $20m	
$2.5m spent on new equipment to develop a new successful products	$3m paid to acquire the brand name Fast Design	
$3m spent on a licence to operate a production facility for six years	$1m spent on the construction of a product prototype before its launch	
$1.5m spent on training customer service staff expected to increase revenue by $5m	$2m paid as goodwill when acquiring Unique Co	

2. Assoria Co had $20m of capitalized ~~development~~ ~~ex~~penditure at cost brought forward at 1 October 20X7 in respect of products currently in production and a new project began on the same date.The research stage of the new project lasted until 31 December 20X7 and incurred $1.4m of costs. From that date the project incurred development costs of $0.8m per month. On 1 April 20X8 the director of A Co became confident that the project development at 30 September 20X8. Capitalized development expenditure is amortized at 20% per annum using the straight line method.

What amount will be charged to profit or loss for the year ended 30 September 20X8 in respect o research and development costs?

A. $8,280,000

B. $6,880,000

C. $7,800,000

D. $3,800,000

Answer:

左3，右2，3，4

C

IAS 40 Investment property

1. Definition and recognition

1.1 Definition

Investment property is property held to earn rentals or for capital appreciation or both

☐ 投资性房地产常见例子：

- Land held for long-term capital appreciation
- **Land** held for a currently **undetermined future use** 没有决定用途的土地属于投资性房地产
- A building that is vacant and is held to be leased out
- Property that is being constructed for future use as investment property

○ 以下不属于投资性房地产：

- Property intended for sale in the ordinary course of business
- Property being constructed on behalf of third parties
- Owner-occupied property including property held for future use as owner-occupied property

1.2 Recognition

① it is probable that the future economic benefits that are associated with the investment property will flow to the entity

② The cost of the investment property can be measured reliably.

2. Measurement

2.1 Initial measurement

Investment property is measured initially at cost, including:

- Purchase price
- Property transfer tax
- Transaction cost
- Professional fee

2.2 Subsequent measurement

IAS 40 permits entities to choose between:

Fair value model	Cost model(=IAS 16)
Investment property is measured at fair value at the end of reporting period: - any gain or loss is included in the statement of profit or loss（投资活动分类） - the investment property in not depreciated	Carry the asset at its historical cost less: - depreciation（投资活动分类） - any accumulated impairment loss (IAS 36)

考点：本准则允许企业在两种方法下任选其一：

① 公允价值法。在该方法下、投资性房地产在初始计量后以公允价值计量，公允价值变动确认进当期损益SPL，属于投资活动分类。

② 成本法。该方法由《IAS 16》予以规定，采用成本法要求投资性房地产在初始计量后采用折余成本（累计折旧后剩余的净账面价值）予以计量，且折旧费用属于投资活动分类。

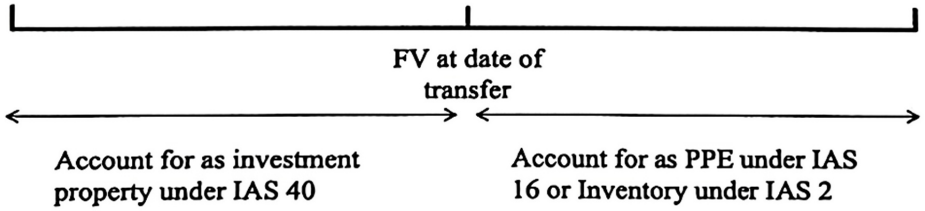
- 本准则要求企业对于其全部投资性房地产都采用统一选定的计量方法来计量。
- 当公允价值无法确定时，企业需采用成本法计量。
- 公允价值法不需要计提折旧。

3. Reclassification / Transfer

Transfer to or from, investment property should only be made when there is a change in use.

需要注意的是，考官很喜欢考察转入投资性房地产，或转出成为投资性房地产，大家记住，一旦在读材料看到有关重大决定的字眼，比如企业决定把办公大楼出租，或者闲置，则证明资产的用途发生改变。一旦用途改变，计量准则也就发生改变。

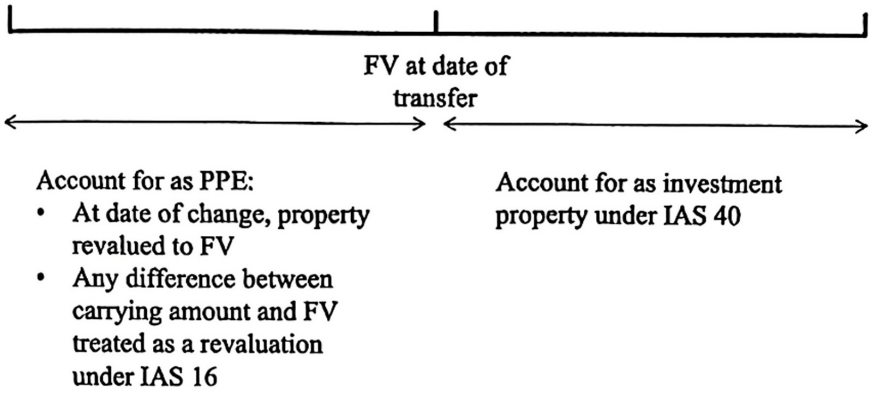
3.1 投资性房地产转为PPE



Step 1: 在转换日对投资性房地产进行最后一次FV调整，变化金额记入当期损益SPL

Step 2: 调整到FV之后再更换成PPE（FV即Cost），后续开始计提折旧

3.2 PPE转为投资性房地产



Step 1: 在转换日对PPE进行最后一次重估，重估增值记OCI/RS，重估减值记SPL

Step 2: 重估到FV之后转成investment property，转换后停止折旧，后续FV变化记入SPL

☑ 划重点：

- 投资性房地产处置时也需要计算处置盈亏：

  Profit or loss on disposal = proceeds - carrying amount

  需要注意的是，投资性房地产处置盈亏属于“投资活动”分类。

- 投资性房地产后续计量首选FV model
- 投资性房地产增值或减值都记入SPL，属于投资活动分类
- 投资性房地产不折旧，即使有使用寿命也不折旧（考过改错题）

  一个投资性房地产选择FV model，则所有投资性房地产都需要选择FV model计量

  一部分投资性房地产，一部分为自用资产PPE，如果两部分能分开出售，则需要拆分计量；如果不能分开出售，当自用资产PPE不占重要组成部分时，整个资产按投资性房地产处理（2024年3月考过文字判断）

【经典例题】

1. 2023年6月模拟卷

Which of the following is an investment property under IAS 40 Investment property?

A. A building that is vacant but held to be rented to third parties
B. Property under construction on behalf of third parties
C. Property that is available for sale in the ordinary course of business
D. Owner- occupied property

2. 2025年3月模拟卷

Which of the following statements is correct regarding investment property?

A. The investment property may be held as owner occupied property or a property held for sale in future
B. An owned investment property shall be measured initially at its fair value
C. An investment property may be subsequently measured using cost model or fair value model
D. Investment property must be depreciated regardless of whether an entity choose cost model or fair value model for subsequent measurement

3. Carter Co vacated its head office building and let it out to a third party on 30 June 20X8. The building had an original cost of $900,000 on 1 January 20X0 and was being depreciated over 50 years. It was judged to have a fair value on 30 June 20X8 of $950,000 At the year-end date of 31 December 20X8 the fair value of the building was estimated at $1.2m.

What amount will be shown in revaluation surplus at 31 December 20X8 in respect of the building?

$_____

Answer: A, C 203000

IAS 36 Impairment of assets

适用于：

IAS 16 PPE

IAS 38 Intangible assets

IAS 40 Investment property（cost model only）

注意：IAS 36 的减值与之前IAS 16中的减值无本质区别，处理方式也相同，只是发生的阶段不同。IAS 16 中的减值发生在后续计量阶段，而IAS 36的减值可以发生在任一时间点，但有前提条件，即减值迹象的出现。

1. Indicators of impairment

Internal indicators	External indicators
① 明显过时陈旧或损坏 Obsolescence or damage ② 用途发生重大变化 Significant changes with an adverse effect in the extent to which, or manner in which, an asset is used or is expected to be used ③ 经济绩效下降 Economic performance and expected net cashflows of an asset are worse than expected ④ 已经或将要出售 The asset is already or will be disposed	① 市价大幅下跌 Decline in asset's market value ② 技术，市场，经济或法律等因素对资产产生负面影响 Adverse effect in the technological, market, economic or legal environment in which the enterprise operates 【PESTEL】 ③ 市场利息率提高 Increase in market interest rates ④ 企业净资产账面价值大于市场资本化金额即股票市值 Carrying amount of net assess of the entity exceeds market capitalization【share price】

☐ 高频考点：有两类资产需要每年年底进行减值测试，即便没有减值迹象出现：

Even if there are no indications of impairment, the following assets must always be **tested for impairment annually:**

① An intangible asset with an **indefinite useful life**

② **Goodwill** acquired in a business combination

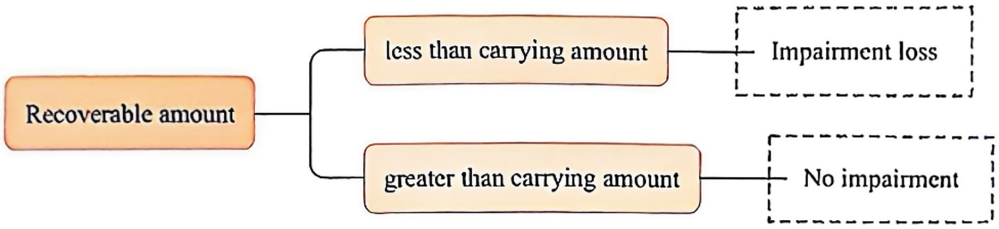
2. Impairment test / review

2.1 Impairment test【背过】

An asset has been impaired if its carrying amount exceeds its recoverable amount. Recoverable amount is the greater of fair value less cost to sell and Value in use（future cash flows generated by the asset discounted at interest rate which allows for the risks specific to the asset）

☑ 考点：减值损失应确认在当期损益SPL中，属于经营活动分类，除非按照另一准则《IAS 16》资产在过去以重估法计量，且产生重估盈余，那么减值损失应作为重估盈余抵减处理。

☑ 如果recoverable amount大于carrying amount 则资产没有减值，无需任何处理



3. Cash-generating unit

3.1 Definition【背过】

CGU is the smallest identifiable group of assets for which independent cash flows can be identified and measured

☑ 考点：It may not be possible to estimate the recoverable amount of an individual asset. Any entity must therefore determine the recoverable amount of the CGU to which the asset belongs. 如果资产存在减值迹象，企业应估计单项资产的可回收金额，如果无法估计单项资产的使用价值，企业应确定资产所属的现金产出单元的可回收金额。

3.2 Allocation of impairment losses for a CGU

The impairment loss is allocated to reduce the carrying amount of the assets of the unit in the following order:

① to any assets that are obviously damaged or destroyed

② to any goodwill

③ to the remaining assets of the unit on a pro-rata basis based on the carrying amount of each asset in the unit

【解释】

在对现金产出单元资产进行减值损失分摊时，应明确分摊顺序：先对明确减值的资产进行减值处理；其次抵减商誉价值；最后，根据剩余资产的账面价值金额，按比例分摊剩余减值损失，进行减值处理。需要注意的是，流动资产不参与此减值损失的分摊

4. Reversal of previous impairment loss

An impairment loss recognised for an asset in prior years should be recovered only if there has been a change in the estimate used to determine the asset's recoverable amount.

The asset cannot be revalued to a carrying amount that is higher than what it would have been the asset had not been impaired originally, ie its depreciated historical cost had the impairment not taken place.

☑ 回转条件: 当现在的可回收金额较之前计算金额相比增加时，企业可以回转之前确认的减值损失

☑ 回转上限: 回转后的资产价值不可以超过历史折旧金额，即净账面价值NBV

☑ 注意：Impairment on goodwill can never be reversed 商誉减值不可回转

☑ 划重点：

- 资产减值：Recoverable amount < Carrying amount（确认减值损失SPL）
- 资产没有减值：Recoverable amount > Carrying amount（资产没有减值，其差值无需调整，直接忽略）考过文字判断
- 两类资产哪怕没有减值迹象，也要每年做减值测试：（考过很多次文字判断）

① Goodwill

② Intangible asset with indefinite useful life

【经典例题】

1. Riley Co acquired a non-current asset on 1 October 20W9 (ten years before 20X9) at a cost of $100,00 which had a useful life of ten years and a nil residual value. The asset had been correctly depreciated u to 30 September 20X4. At that date the asset was damaged and an impairment review was performed. O 30 September 20X4, the fair value of the asset less cost to sell was $30,000 and the expected future cas flows were $8,500 per annum for the next five years. The current cost of capital is 10% and a five-ye annuity of $1 per annum at 10% would have a present value of $3.79.

What amount would be charged to profit or loss for the impairment of this asset for the year ende 30 September 20X4?

A. $17,785
B. $20,000
C. $30,000
D. $32,215

补充：Annuity

1	8,500 * $1/1.1^1$	= 8,500 * 0.91
2	8,500 * $1/1.1^2$	= 8,500 * 0.83
3	8,500 * $1/1.1^3$	= 8,500 * 0.75
4	8,500 * $1/1.1^4$	= 8,500 * 0.64
5	8,500 * $1/1.1^5$	= 8,500 * 0.62

8,500 * 3.75 annuity

2. A business which comprises a single cash-generating unit has the following assets:

	$'m
Goodwill	3
Patent	5
Property	10
Plant and equipment	15
Current assets	2
	35

Following an impairment review it is estimated that the value of the patent is $2m and the recoverabl amount of the business is $24m.

What will be the carrying amount of the property after the impairment loss has been recognized?

A. $8m
B. $10m
C. $7m
D. $5m

3. A cash-generating unit comprises the following assets:

	$'000
Plant and equipment	200
Goodwill	90
Building	700
Current assets	20
	1,010

One of the machines, carried at $40,000, is damaged and will have to be scrapped. The recoverable amount of the CGU is estimated at $750,000.

What will be the carrying amount of the building after the impairment loss has been recognized?

A. $597,000
B. $577,000
C. $594,000
D. $548,000

Answer: A A C

IAS 23 Borrowing costs

1. Qualifying condition

① **Qualifying assets**: takes a substantial period of time to get ready for its intended use 需要经过相当长时间才能达到预计可使用或可出售状态的资产

② The borrowing cost must be unavoidable

③ There must be direct relationship between qualifying asset and borrowing amount

2. Qualifying period

2.1 资本化期间起始日期：【符合以下所有条件的日期开始资本化】

① Expenditure for the asset is being incurred; 发生支出

② Borrowing costs are being incurred; 发生借款成本利息

③ Activities that are necessary to prepare the asset for its intended use or sale are in progress. 已开展准备活动

2.2 资本化期间截止日期：【二选最早日期】

① Once substantially all the activities necessary to prepare the qualifying asset for its intended use or sale are complete. 已结束相关建造活动

② Repayment of the borrowing 已还款

2.3 资本化暂停：【停工期利息】

Dr Interest expense（SPL） X

Cr Cash X

在现行开发活动发生中断时，企业应暂停借款成本的资本化，期间的利息需要费用化记入SPL

- 考点：在资本化期间产生投资收益：企业在计算资本化金额时，应减去闲置借款进行的临时性投资收益
- 不处于资本化期间的投资收益：确认在当期损益中SPL，属于投资活动分类

3. Qualifying interest rate

① 专项借款：Borrowings specifically made to acquire a qualifying asset【使用专项利率】

② 普通借款：Funds for the project taken from borrowings generally【使用加权平均利率】

【经典例题】

1. Fido Co has the following loans in place throughout the year ended 31 December 20X8 which constitute its general borrowings for the period.

10% bank loan $140m
8% bank loan $200m

On 1 July 20X8 $50m was drawn down for construction of a qualifying asset which was completed during 20X9.

What amount should be capitalized as borrowing costs at 31 December 20X8 in respect of this case?

A. $5.6m
B. $2.8m
C. $4.4m
D. $2.2m

2. 2024年6月模拟卷

Beta Co began construction of its new factory building on 1 March 20X3. The cost of the construction was estimated at $1.5 million.The company borrowed $800,000 from a local bank on 1 July 20X3 at the interest rate of 6% pa. The construction completed on 30 November 20X4. Beta had temporarily invested $350,000 of the borrowed amount from 1 July 20X3 to 31 December 20X3 at 4.5% pa.

What would be the amount of borrowing cost to be capitalised in respect of the factory building according to IAS 23 Borrowing Costs?

A. $68,000
B. $84,000
C. $60,125
D. $13,125

Answer: D, C

IAS 2 Inventory

1. Definition

Inventories are assets:

- held for sale in the ordinary course of business
- in the process of production for such sale
- in the form of materials or suppliers to be consumed in the production process or in the rendering of service.

Types of inventory:

- Goods purchased
- Finished goods produced
- Work in progress
- Raw material

2. Measurement

Inventory should be measured at the lower of **cost** and **net realizable value**.

2.1 Cost

Cost =	Cost of purchase	+	Cost of conversion	+	Others
	• Purchase price • Import duties • Carriage inward • Handling cost		• Direct cost (material and labour) • Fixed and variable overheads: ① Indirect cost (material and labour) ② Factory depreciation ③ Supervisors wages ④ Storage cost and carriage cost (raw material and WIP)		• Design cost

【存货成本不包括】

① Abnormal loss
② Storage cost of finished goods
③ Carriage outward
④ Administrative overhead
⑤ Selling cost

☑ 考点：Fixed production overheads should be allocated to units of production based on a normal level of activities under absorption costing. Interchangeable items, following estimation techniques can be used:

- FIFO
- Weighted average cost
- LIFO is not allowed under IAS 2 不允许使用

☑ 考点：FIFO对比AVCO

	FIFO	AVCO
Closing inventory	高	低
Cost of sales	低	高
Profit	高	低

如果企业将FIFO更改为AVCO，调整分录【背过】：

Dr Cost of sales X
Cr Closing inventory X

2.2 Net realizable value

NRV is the estimated selling price in the ordinary course of business less the estimated cost of completion and the estimated costs necessary to make the sale:

Estimated selling price	X
Less: Cost to completion	(X)
Less: Selling cost	(X)
Net realizable value	X

The NRV may be less than cost due to:

- Errors in production and purchase
- An increase in cost
- Fall in selling price
- Obsolescence of products

当存货减值，减值金额需要确认在当期损益中【背过】：

Dr Cost of sales X
Cr Closing inventory X

3. Cost of sales

Opening inventory	X
Add: purchase	X
Less: closing inventory	(X)
Cost of sales	X

4. Gross profit percentage

Gross profit margin =	$\frac{\text{Gross profit}}{\text{Sales}}$ * 100%
Mark up =	$\frac{\text{Gross profit}}{\text{Cost of sales}}$ * 100%

【经典例题】

1. 2020年12月考官报告

At 31 December 20X4, Litch Co had, in inventory, 100 items of work in progress which had cost $14,900 to produce. It estimated that work in progress would cost $13 per unit to complete, and that each unit would then sell for $166.

Direct selling costs are estimated at 2% of revenue.

In accordance with IAS 2 Inventory, what is the correct value of Litch Co's inventory as at 31 December 20X4?

A. $14,900
B. $16,268
C. $16,200
D. $14,968

2. 2023年12月考官报告

At March 20X3, Algernon Co had equipment in its inventory which was manufactured to a customer's specific requirement and had originally cost $380,000.

The selling price had been agreed as $420,000 but new regulations mean that safety measures must be added at a cost of $60,000 before the equipment may be sold. The customer has agreed to pay for half of these modification costs through an increase in the overall selling price.

In accordance with IAS 2, what is the value of these inventories to be presented in the statement of financial position as at 31 March 20X3?

A. $380,000
B. $390,000
C. $410,000
D. $440,000
